Webinar on Entrepreneurship and Family Business

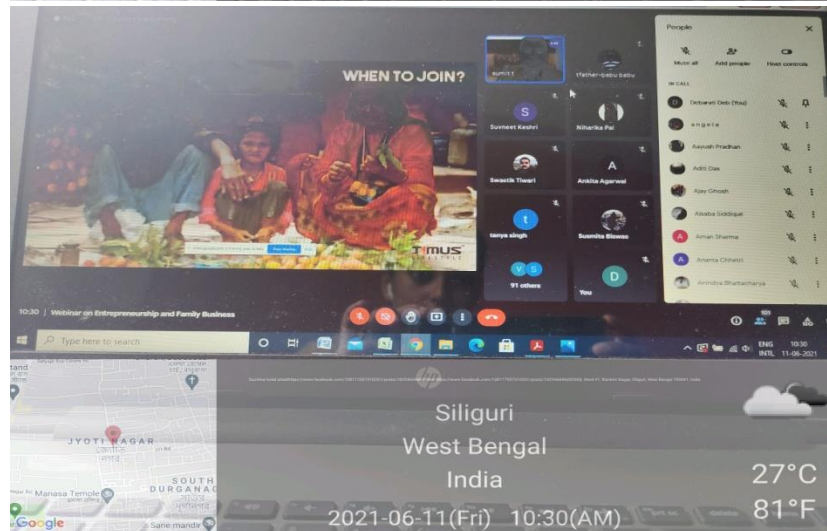

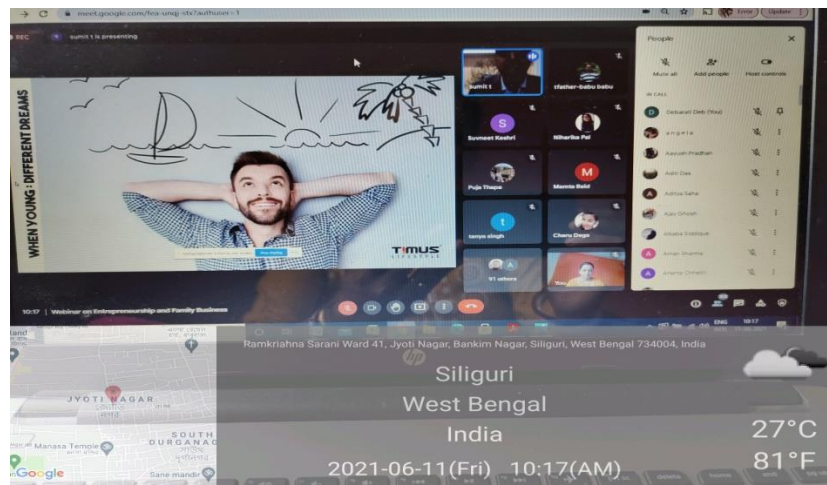

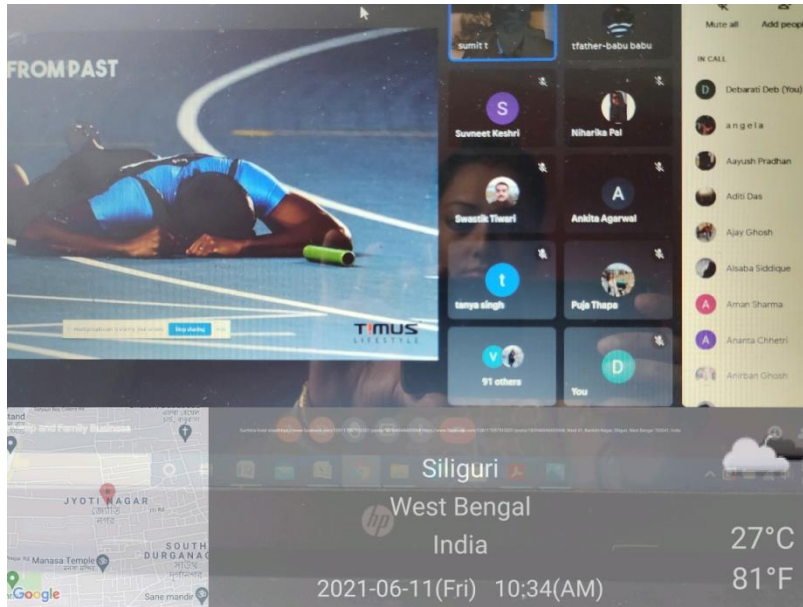

The webinar on “Entrepreneurship and Family Business” was organised by Department of Management Studies, Salesian College, Siliguri campus and IQAC, in collaboration with Asian Institute of Family Managed Business on 11th June ,2021.The program began at 10 a.m. with the inaugural session which comprised welcoming of the guest by Mrs. Debarati Deb, Assistant Professor, Department of Management Studies, Salesian College Siliguri Campus, followed by the opening invocation by Fr.(Dr) Babu Joseph, SDB, Vice-Principal (Commerce and Management), Salesian College, Siliguri campus.

The platform was then handed over to the speaker of the day Mr. Sumit Tiwari, CEO, Timus Lifestyle, a luggage and Backpacks manufacturing company based in Nasik. Mr. Tiwari, is very enthusiastic and has shown dynamic approach to build brand Timus which is sold across e-commerce portals today along with 200 plus dealer network. He did his BE in Mechanical Engineering from MIT, Pune and PG from SP Jain Institute of Management and Research. Recently, he co-founded media and advertising company, Ketchupp and he is also a co- founder at Auraa Timus HeathCare Pvt Ltd which makes high quality FFP2 certified N95 mask. He began the webinar with the introduction of Entrepreneurship followed by Family Business. Next, he highlighted the features and characteristics of each of the topics, shared ideas and facts about the dynamic world and also the solutions that one can come up with while starting a career an Entrepreneur. He focused on being resilient, perseverance and consistency while dealing with the environment. According to him, the four choices that could shape entrepreneurial strategy were Identity, Competition, Technology and Customer.

The webinar also helped in coming up with solutions of failures and positivity that one should adapt. Mr. Sumit also spoke about his personal stories of failures and successes. His constant hard work and perseverance has paid him back and made him what he is today. He, therefore, repeatedly highlighted on being confident, positive and consistent in a work in order to achieve the desired success. He taught us that hard work always pays off well in the end. Enlightening us with all his words of wisdom, Mr. Sumit ended his presentation. After which the question and answer session was followed where he answered many questions of his viewers.

With this we witnessed the end of the webinar with a vote of thanks by Mrs. Debarati Deb, Assistant Professor, Department of Management Studies, Salesian College, Siliguri. The webinar was a huge success.

WORKSHOP ON
‘RESEARCH PROPOSAL AND REPORT WRITING
RAPPORTEUR’S REPORT

01/12/2020

A workshop was organised by the Department of Education, Salesian College Siliguri on the theme ‘Research Proposal and Report writing’ on 1st December 2020 over Google meet platform and YouTube. Around 50 participants were present for the workshop. The session began approximately at 12:10 pm and extended up to 2:15pm. The resource person for the session was Dr. Savita Mishra, Principal of Vidyasagar college of Education Phansidewa, West Bengal. The workshop began with a short introduction of the esteemed resource person by Ms. Ranita Chakraborty. This was followed by the welcome address by Fr. (Prof.) George Thadathil, Principal, Salesian College.

Before the presentation, a brief framework was provided with respect to the research and process of writing, followed by Dr. Savita Mishra’s discussion on how to identify the research problem. She also mentioned the area on which one is willing to do the research. In this context the resource person drew the attention of participants on how to write a research proposal. She discussed on the structure of a research proposal, elaborating on the different aspects of the proposal. Speaking of the process in research writing, Dr. Mishra shared her experience while writing her Ph.D. thesis. While elaborating on the steps of the research proposal the presentation mainly focused on the introduction, literature review, rationale of the study, statement of the problem, objectives of the study, hypothesis of the study, scope and delimitation, methodology, sample, tools, techniques of data analysis. She also discussed about importance of abstract and what should be taken into consideration while writing an abstract.

In conclusion, Dr. Savita Mishra emphasised on the different styles of reference writing such as those of APA, Chicago and the MLA referencing style. Apart from proper referencing, the resource person also drew the attention of the participants to the need to avoid plagiarism at all cost while preparing the research report. In this regard, Dr. Mishra presented an in detailed discussion on the various ways to avoid plagiarism and the need for proofreading before submitting the final research report.

Following the presentation, there was an activity session in which the participants were asked to prepare a research proposal on any topic of their choice. During the course of this activity session, many queries were raised by the participants to the resource person regarding the various aspects of the research process. Towards the end of the activity session, the participants presented their research proposal. This was followed by the closing remark by Fr (Dr) George Chempakathinal, Vice Principal, Arts/Humanities Stream, Salesian College Siliguri. The workshop ended with a vote of the thanks that was presented by Ms. Priya Topno, Assistant Professor, Department of Education, Salesian College Siliguri.

Online Workshop on Research Proposal and Report Writing

By

Dr Savita Mishra

Principal

Vidyasagar College of Education

Phansidewa, West Bengal

About the Workshop

Preparation of the research proposal as well as the final report is no less challenging a task than the research itself. It requires proper planning, reviewing, imagination, creativity and resourcefulness. The style of preparing therefore requires objectivity and precision thereby intending to provide information of not only the problem identified, but also presenting a clear picture about the methodology to be used, analysis and interpretation to be made and the conclusions reached. To achieve these purposes is not an easy task as it is more complicated owing to the various styles of writing the proposal as well as the report.

Taking cue from the above, this online workshop organised by the Department of Education primarily focuses on providing an insight on the format and style of writing of proposals and reports for researches conducted for academic purposes and for various funded projects. It will also throw light on ways of preparing an academic paper or research article for high impact factor journal publications. This workshop is intended for any researchers, academicians and students from the discipline of Social Sciences interested in pursuing a career in Research, conducting small Action Research Projects in their institutions or participating in various funded projects.

MCJH FACTSHALA WORKSHOP

January 2020, Siliguri : The Department of Mass Communication and Journalism organized a workshop on the topic 'a fight against misinformation and empowering citizens through news and information literacy' from Factshala India.

The speaker for the event was Dr. Shourini Banerjee, certified professional trainer (FACTSHALA, news and information literacy initiative by DataLEADS with support from google.org) and academician, Dr. Banerjee has completed her PhD research on "gender and masculinity in television commercials-a critical study", she has also published and presented multiple papers in national and international conferences.

The event commenced with an opening speech by Fr. (Dr.) George Thadathil (Principal, Salesian College), father spoke about the importance of differentiating between news that is derived and news that is concocted, he said "one's proposition must not harm one's right to be".

Therafter, Dr. Banerjee began her talk with how one can develop independent thinking and verify content by fact checking. "Information empowers but over load cripples" expressed Dr. Banerjee. The session focused on the sources of information, why good information is important and how it affects socio-economic and political decisions.

Dr. Banerjee then continued on the dangers of misinformation, bias, manipulation on social media and the effects of being 'confined in a box of content'. She elaborated on filter bubbles, echo chamber and types of propaganda that exists in the current world. Dr. Banerjee concluded her speech by highlighting the importance of critical thinking and ways to improve it with multiple interactive exercises followed by a question and answer session.

The session then concluded leaving the participants with new perspective on news and information.

Three Days Workshop on Streetplay/Nukkad Natak and Script Writing

Department of Social Work with Team Arise

The Department of Social Work organised a Three Days Workshop on Street Play/ Nukkad Natak and Script Writing on 18th 19th and 20th March 2021. The resource person was Pinky Maam (Director of Arise foundation) and her team. The purpose of the program was to provide Social Work students, training in the basic techniques of street theatre and Script Writing thereby equipping them to communicate with the people effectively through this medium.

The program started at 11:00 am on the 18th March. The program started with a mirthful action song followed with a skit on outlook into the social issues.

The groups took two socially relevant topics and presented it as a small drama.

The second day 19th march interaction and game, the game was all about gaining power and transferring the same to fellow human beings with no more or less of the effect. Through this game the trainees understood the importance of sharing, give & take, tolerance, strength of support system in life as a social being.

The next session of the day was mime. According to the instructions from the trainer both individual and group mime was performed. The session helped the trainees to identify their own talents and skills enabling them to showcase it in public without stage fear instilling confidence.

Third Day 20th of March 2021, the afternoon session focused on the making and delivery of street play. Initially trainees were divided into four groups to make up a street play of their choice on any social issue. The basics which form the substance of street play were taught later. The significance of body language, attitude, verbal clarity, emotions emphasized, enabled each one of them to add to the performance. At the end of the day trainees were asked to re-present the same bringing in the necessary changes in order to brush up their creativity.

Trends in Science and Technology - TIST 2021

A one day National Conference on “Trends in Science and Technology 2021” was organised by the Science Departments of Salesian College, Siliguri campus, on 28th February 2021. It was held in blended mode where dignitaries and some participants attended online and organisers and some participants attended offline. It began with the lighting of the lamp by the Fr. (Dr.) George Thadathil, Rector and Principal, Salesian College, Dr. S C Das, Rtd. Professor of Physics, Mr. Dhirodatta Subba Dean of Science, Mr. Subhajit Paul, Head, Department of Mathematics and Mr. Prajwal Chettri, Head, Department of Physics. Dr. S C Das conducted welcoming ceremony and outlined the background of the Conference and mentioned that it aimed at providing a platform for exchanging views on latest trends in the realm of Science and Technology, knowledge sharing by domain experts and research scholars, and also to establish connections with institutions of National importance with the people of this region. He laid emphasis on the fact that we were observing the National Science Day.

Dr. S C Das

Father (Dr.) George Thadathil, Principal of the College, continued with welcoming all and then moved to introduction of the program to all who were present and threw coherent light on the relevance of organising such conference in the context of the current scenario of higher education in India, despite the pandemic situation throughout the world. He emphasised the importance of technology in higher education and the need to keep up with times, especially in regard to the major changes being brought in with reference to the new National

Father (Dr.) George Thadathil

Education Policy. After this, the keynote speaker – Dr. Arnab Chakraborty, Associate Professor, Applied Statistics Unit, Indian Statistical Institute, Kolkata, was introduced by Mr. Subhajit Paul, Head, Department of Mathematics, Siliguri Campus.

Dr. Arnab Chakraborty

Dr. Arnab Chakraborty delivered his “National Science Day” talk on this year’s theme “Future of Science Technology and Innovation: Impacts on Education, Skills, and Work”. Starting with four fundamental observations:

- (a) the country is technologically impoverished
- (b) our country was great – Aryabhatta, Brahmagupta, Madhavacharya and the invention of *Calculus*
- (c) our country is great – Nobel prize winning scientists like Satyen Bose, Jagdish Chandra Bose, Ramanujan, C V Raman and others
- (d) booming of higher education institutions

Dr. Chakraborty went on to present his own take on the state of things. First thing that he was critical about was the mercenary attitude of his countrymen in matters related to Science and Technology – that the people involved, in general, across all institutions, were doing work for financial benefits, for publishing in reputed journals and because government has that project funded, and not for the love of it. He went on to say that our people were good at utilising apps, technologies developed by others but poor in creating original products, be they software or others. He also mentioned inadequacy of infrastructure support in institutions to support research. He further mentioned people’s attitude of running after high end advanced research areas in science and technology whereas research and development in simple areas could have made more sense due to its applicability in people’s daily lives. He concluded with the opinion that people need to be more innovative and more practical minded and ready to put in more effort in originality and not let others exploit our weaknesses.

There was interactive session after the keynote talk. Fr. George Thadathil, our Principal, expressed his agreement on the views shared by the speaker. He, however, mentioned that all was not lost by giving the example of own institution where we developed our own Enterprise Resource Planning software, after having experimented with a Software company for such system for three years. This was followed by a short intermission before the next session.

The first technical session was chaired by Mr. Bicky Sharma, Head, Department of Economics. He introduced the plenary speaker Dr. Mona Chettri, post-doctoral research fellow, Australia-India Institute, University of Western Australia. Dr. Mona’s talk was titled “*Gender, migration and the precarious labour in the Eastern Himalayan region*”. She started by acknowledging that she was the only speaker from the Social Science and she thanked Fr. Principal and the organisers for extending the invitation to her. She mentioned that she was from Sikkim and that her research studies are on Sikkim and Darjeeling Hills.

Her focus of the talk was on young, mobile women who are working in the informal sector - primarily in manufacturing and servicing sector, and situated in Sikkim. Key points of her talks were:

- Emergence of new labouring class as a result of globalisation and liberalisation
- Intersections of gendered constructions of labour and liberalisation
- The increasing precarity and instability of employment in the eastern Himalaya

Gender, Migration and Precarious Labour in the eastern Himalaya

MONA CHETTRI, PhD
POST-DOCTORAL RESEARCH FELLOW
AUSTRALIA-INDIA INSTITUTE
UNIVERSITY OF WESTERN AUSTRALIA

Dr. Mona Chettri

Majority of these women come from educationally or economically disadvantaged families. They are working in factories, shops, malls, restaurants and cafes – low paying jobs and having no safety nets because of the informal employment sector. This sector is thriving due to government incentives, and globalisation and changing consumption patterns of people and business owners trying to increase sales. This is causing significant migration of female population from rural to urban areas. Most of them are first generation employees in this sector. They are at increased risk of exploitation. So, on the one hand they are getting employment; on the other hand, they are being exploited too. She left with the question of finding and developing safety nets for this group of people. Her talk ended with a short question and answer session.

The next presenter was Ms. Manasi Debnath, faculty, Department of Geography, Salesian College. Her presentation was on “*Reconstruction of Paleoclimate with reference to Cryosphere dynamics in the Changme Khanpu valley, Sikkim*”.

Ms. Manasi Debnath

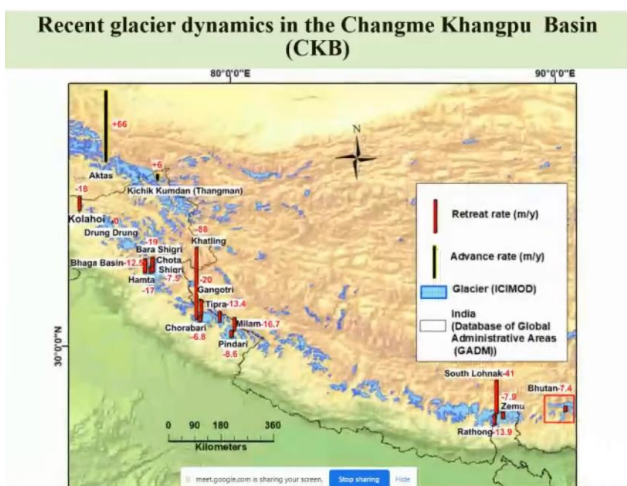

Reconstruction of Palaeoclimate with Reference to Cryosphere Dynamics in the Changme Khangpu Valley, Sikkim Himalaya

Manasi Debnath*

Assistant Professor
Department of Geography,
Salesian College (Siliguri)
University of North Bengal

She started by explaining paleoclimate as climatology prior to the instrumental records of temperature, precipitation and other weather phenomena. She mentioned that such studies have been done for other parts of the Himalayas like Garhwal, Karakoram, Nepal and south-east China. It is important to know the information for future modelling as some civilisations have been lost in the past due to abrupt climatic changes. This leads us to the glaciers in the Himalayas. In Sikkim, glaciers are retreating at fast rates. Her study was about reconstruction of a model of past glacier landform within the Changme-

Khangpu valley and identification and assessment of paleoclimate changes within the Quaternary period. She led us through the analysis of her study where she explained the chronological events that took place in the past in the formation and movement of this glacier and corroborated the findings with studies done elsewhere. She also explained that her data came from Sentinel 2A, LANDSAT 8-OLI, SRTM-DEM and field survey. She also explained the methodology used in the investigation. Due to paucity of time, question-answer session was skipped and program moved to the next presentation.

The next speaker was Dr. Protip Basu from Siliguri College. The topic was “*Amalgamation of Sequence Bioinformatics and structural Bioinformatics – teaching Bioinformatics to lay persons and non-biologists*”. He spoke on how to bring about changes in methods of teaching that would help students reach the right place quickly. He took, for example, the ncbi site which is the go-to place for all students of biology. However, getting to the right place is not easy.

Dr. Protip Basu

He mentioned that due to the pandemic situation, our dependence on technology is increasing and we are having to continue education in the new normal. Key points of his talk were:

- Intelligent use of search engines. For example, in case of NCBI portal, students can narrow down the search by choosing the right database, followed by using key word combinations in proper manner, so the search result list is narrow and specific. Moreover, the portal provides some colour coding in the result pages and the balloon/context sensitive help feature is of great help. Similarly, searching google also can be made smarter by making use of the advanced features and the choice of right combinations of key words.
- Teachers to make the presentation by making use of animated graphics, colour schemes with explanations.
- Search results to be stored locally and BLAST (Basic Local Alignment Search Tool) to be applied.
- His research on structures of protein (PDB – Protein Data Bank portal), crystal structure of Human Argonaut (4OLA).

This was followed by lunch break.

The second technical session was chaired by Dr. Prajwal Chettri, Head, Department of Physics. He introduced the plenary speaker Prof. Somendra Mohan Bhattacharjee, Head of Department of Physics, Ashoka University. His talk was titled “*Emergent phenomena: more is different*”.

Prof. Bhattacharjee started from Paul Adrian Maurice Dirac’s 1929 controversial statement: "quantum mechanics is now almost complete ... [and] the underlying physical laws necessary for the mathematical theory of a large part of physics and the whole of chemistry are thus completely known", although he admitted that "the difficulty is only that the exact application of these laws leads to equations much too complicated to be soluble."

This sweeping statement was due to the success of Quantum Mechanics which overpowered everything in those days, and influenced the works

Prof. Somendra M Bhattacharjee

of Physicists for decades. They forgot how science started – through observations and measurements. The laws of motion and gravitation discovered much earlier by Kepler and Newton could explain planetary motions well, and they had nothing to do with Quantum Mechanics. In truth, what works at the micro scale, in the constituents, changes / emerges into something quite different at macro scale. He gave a number of illustrations to show emergent behaviour – traffic jam with cars on the road, matter changing from solid to liquid to gas, probability distribution of gas molecules in terms of speed/ energy [Maxwell-Boltzmann distribution] giving rise to Boyle’s law, Charles’ Law. So, reasoning in the same way, Newton’s law is really an emergent phenomena of quantum mechanics laws. In the same way collections of cars each obeying Newton’s laws of motion, ends up behaving in a different way at traffic jams – involving probabilistic and statistical factors. This was what was termed “more is different” by a Nobel laureate Philip W. Anderson of Princeton University.

Mr. Bikramjit Chandra

The next presenter was Mr. Bikramjit Chandra, faculty, Department of Physics, Salesian College. His presentation was titled “*Detection of Phosphine in the Venusian atmosphere – A Discussion*”.

There was a paper published by Jane S. Greaves and associates in September 2020 titled “*Phosphine gas in the cloud decks of Venus*”. This was a paper on Radio and Planetary Astronomy. It created quite a bit of excitement among the scientists who are hopeful of discovering signs of life in other planets. It claimed that they used two radio telescopes JCMT and ALMA and detected phosphine, a bio signature gas, at 56 km height from the surface of Venus. Their conclusion was based on 5 year data from the telescopes. Existence of life forms was a conjecture from the 70’s and some papers were written in 2017 and 2020 prior to the current paper, where it was suggested that between 40 – 70 km from the surface, conditions were favourable.

Comparing the absorption signature of phosphine with the sample data analysis, they found a similarity and concluded that this could be phosphine in Venus' atmosphere. And they tried to explain how the gas could have come into existence on the basis of 75 different chemical reactions that are possible; but they found that the rate of destruction of phosphine was much higher than the rate of formation.

Critics of this theory asked the question: "how do you know you are not detecting sulphur dioxide?" Greaves and associates defended their claim.

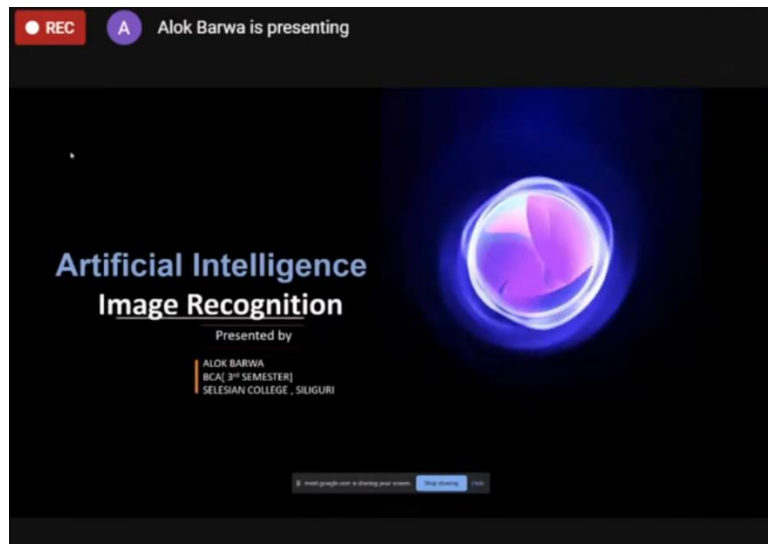

However, in April this year, Andrew P. Linkowski and associates published a paper "*Claimed detection of PH_3 is consistent with SO_2* ". They did the modelling of both phosphine and sulphur dioxide in the Venusian atmosphere, and found that the signature of SO_2 is twice as strong as PH_3 , and that for them to be detected,

they should exist at 80 km above the surface and not 56 km. This study finally put to rest the conjecture of phosphine's existence in Venusian atmosphere.

The next presenter was Mr. Alok Barua, student, BCA third semester. His topic was "*Artificial Intelligence and Image Recognition*".

He spoke on the combination neural network methodology. He started by mentioning the image recognition CAPTCHA that we encounter while trying to login or access a web resource. Going to the very fundamental of image recognition, he explained how the gradient descent method works and algorithmically a computer recognises a figure. This algorithm translates matrix data to a linear array and does the work.

Alok Barua's presentation

Mr. Sandeep Sengupta

The last technical session chair person was Mr. Subhaji Bose, Deputy Head, Department of Computer Science and Applications. He introduced Mr. Sandeep Sengupta, Managing Director, Indian School of Ethical Hacking (ISOEH), Kolkata.

Mr. Sengupta built on the National Science Day theme. He showed the following slide and asked students to understand how a future home / office is going to look like. This represents the devices/ appliances inter-connected in the home network. This is what we call as Internet of Things (IoT).

Then he mentioned that youngsters need to be ready for jobs that do not exist today. He spoke about Industry 4.0 which is presently going on. Then he went on to explain what the current job trends are and which industries youngsters are more likely to get jobs. One of them being in the area of Cyber security. He further mentioned that the government needs 500,000 trained professionals; but as of today there are only 70,000. He mentioned how important it was for new generation of students to choose a career in such field. And the salary is very high for candidates who can prove their skills! To help students, Salesian College has already partnered with ISOEH for industrial training of students. He encouraged students to make the best of the opportunities available.

Next presenter was Mr. Amit Singh, student of BCA, third semester. His topic being "*Cyber Security Awareness*" he explained why awareness was important. Some of the concepts he mentioned were:

- Technology cannot protect us from everything
- Hackers go where security is weakest
- Risk reduction
- Being aware and alert

How to protect:

- our personal data such as Credit/debit card information

- Medical data
- Computer resources

We could achieve these by:

- Keeping operating system, browsers, network system up-to-date with latest fixes/ patches
- Using proper anti-malware software
- Using proper password management tools
- Using two factor authentication
- recognising scams
- device safety protocols
- internet safety protocols

Mr. Amit Singh

Final presenter was Mr. Rahul Chettri, student, BCA third semester. His topic was “*Artificial Intelligence*”. Starting from the use of drones in agriculture for spraying water or pesticides, AI is being used by companies for hiring staff, financial services, medical science, advertising and so on, Rahul took us through some of the key challenges and opportunities, gradually to the next level of future possibilities.

He took us to the conclusion:

“Artificial Intelligence is the product of both science and myth. The idea that machines could think and perform tasks just as humans do is thousands of years old. The cognitive truths expressed in AI and Machine Learning systems are not new either. It may be better to view these technologies as the implementation of powerful and long-established cognitive principles through engineering.”

Rahul Chettri

Having come to the end of technical sessions, we had our Vice Principal, Fr. Aju Kurian, with his final words of congratulations to all the speakers and organisers, and encouragement to the faculty and students of Science Departments to carry on with the good work.

Fr. Aju Kurian

Keeping in mind the pandemic situation that could stretch for another year, he encouraged faculty to find innovative ways to make teaching experience rich.

Then led by Mr. Dhiodatta Subba, Dean of Science, followed release of two publications

Fr. George Thadathil

- IT Policy handbook of the institution
- DigiTrek 2020, Science Deanery magazine for the year 2020.

Before the release of IT Policy handbook, Fr. George Thadathil, Principal, explained the background that led to the work on the policy. For the benefit of guest speakers, he mentioned that the institution had its own in-house developed Enterprise Resource Planning software, had already embarked on the Learning Management System usage prior to the pandemic situation, and

during the pandemic had taken recourse to experimenting and adopting various technologies for online education. Moreover, the institution has its social media presence. On the basis of various experiences over the years, our institution has felt the need to develop its own IT policy.

Then followed Valedictory session where participants who were physically present were awarded Certificates, and the main speakers, all of whom participated online, were informed that e-certificates would be sent to them followed by physical certificates by post. Fr. Vice Principal handed out the certificates.

Release of IT Policy handbook and DigiTrek 2020 magazine

Certificate ceremony

Finally, Vote of thanks was given by Mr. Bikramjit Chandra, on behalf of the organising committee. This was followed by a photo session inside the Hall, and one outside the New College building.

Number of participants were as follows:

Online – 58

Offline - 25

Responsibility Chart:

Registration	Certificates
Faculty in charge: Ms. Snigdha Roy	Ms. Yadika Prasad, assisted by Mr. Amit Lepcha
Brochure, posters, invitations	Food
Faculty in charge: Mr. Subhajit Bose, Mr. Tanay Bhadra	Faculty in charge: Mr. Abhijit Dey
Technical	Reporting
Faculty in charge: Ms. Yadika Prasad, assisted by Mr. Simon Lepcha and Mr. Praveen (Cyril) Singh	Faculty in charge: Mr. Dhirodatta Subba
Photography	Logistics
Faculty charge: Mr. Subhajit Paul	Faculty charge: Mr. Mayukh Mazumdar and Mr. Anuj Bhagat

Onsite participants

The organising committee is ever grateful to the College management without whose support and blessings this event would not have been possible. This is the fifth consecutive year we, the Science Departments, have been privileged to host this National Conference. We express our heartfelt gratitude to all the volunteers – students, support staff, campus coordinators and faculties. With everyone's cooperation we hope to take our Institution forward in the path of excellence.

Webinar:

1	Title of the Webinar:	Community, Diversity and Egalitarianism in Indian Society.
2	Date:	15th September, 2021
3	Time:	6:30 pm
4	Mode:	Online
5	Link:	https://meet.google.com/fmx-iira-xdd
6	Total Number of Days:	1
7	Duration of Event (Days):	2 Hours
8	Name of the Resource Person-1:	Dr. Bharat Patankar
9	Name of the Resource Person-2:	N/A
10	Name of the Resource Person-3:	
11	Organized by Dept/Club/Cell /Committee:	History, Political Science & Sociology Department
12	Total Number of Participants:	124
13	Conveners:	Mr Pawan Rai
14	Co Conveners:	Mr Samip Sinchuri & Mr Prayash Rai
15	Faculty Incharge of Report & Upload in ERP:	Mr Prayash Rai

The Faculty incharge of Report must submit the detailed reports, documents and geo tagged Photos of the events to the IQAC office within 2 days of the completion of the event and upload the reports in the College ERP.

REPORT

“Community, Diversity & Egalitarianism in India Society”

*Organised by Department of Political Science, Sociology, History in
collaboration with IQAC of Salesian College Sonada – Siliguri.*

The webinar started with the prayer by Fr. Rector (Dr.) Tomy Augustine by asking God's blessings and guidance on the seminar.

After the prayer by Father Rector Tomy, Mr Pawan Rai (HoD) Department of Political Science gave an introduction of Prof. Gail Omvedt who was a sociologist, a human right activist born in Minneapolis on 2nd of August 1941; a prolific writer and a thinker, who studied at Carleton College at UC Berkeley. She did her PhD on *Cultural Revolt in a Colonial Society: The Non-Brahman Movement in Western India, 1873-1930* from Berkeley University in 1973. She came to India for the first time in 1963 as an English tutor in Fulbright Fellowship. Prof. Omvedt's contributions can be categorized into two, Academics and Social activism. In the field of Academics Prof. Omvedt wrote numerous books and articles, she wrote extensively on caste, class and gender. She was associated with many research projects she was also a consultant for Food and Agriculture Organisation (FAO), United Nations Development Program (UNDP), [Oxfam Novib](#) (NOVIB). She also served as Dr. Ambedkar Chair Professor at National Institute of Social work and Social Sciences (NISWASS) in Orissa. She was also a Professor of Sociology at the University of Pune and Asian Guest Professor at the Nordic Institute of Asian Studies, Copenhagen. She was also a Senior Fellow at Nehru Memorial Museum and Library and also a research Director at [Krantivir Babuji Patankar Sanstha](#). As far as Social Activism is concerned Prof. Omvedt's contribution in Social Movement in India is immense, she was a powerful force in Dalit and anti-caste movement, environment movement and farmer's movement. She was the vanguard of rural women movement. She was active in [Shramik Mukti Dal](#), Stri Mukti Sangarsh Chalval which works on issues of abandoned women in Sangli and Satara districts of southern Maharashtra, and the Shetkari Mahila Aghadi, which works on issues of women's land rights and political power.

Prof. Omvedt wrote extensively on caste, class and gender some of the remarkable works by her are *Cultural Revolt in a Colonial Society: The NonBrahman Movement in Maharashtra* (1966); *We Shall Smash This Prison: Indian Women in Struggle* (1979); *Reinventing Revolution: New Social Movements in India* (1993); *Dalits And The Democratic Revolution: Dr. Ambedkar And The Dalit Movement In Colonial India* (1994); *Buddhism in India : Challenging Brahmanism and Caste* (2003). For her outstanding contribution in the field of academics and social activism she was bestowed with numerous awards and fellowship some of the remarkable fellowship and awards are: Honorary Woodrow Wilson Fellowship (1964–65); Fulbright Fellowship as Tutor in English in India, (1963-1964); University of California Graduate Fellowships, (1964–65, 1965–66); American Institute of Indian Studies, Junior Fellowship for PhD research in India on “The Non-Brahman Movement in Maharashtra,” (1971); American Association of University Women, Fellowship for research on “Women’s Movement in India,” (1975); Savitribai Phule Puraskar, Padmashri Kavivarya Narayan Surve Sarvajanik Vacanalay, Nashik, (2002); Dr. Ambedkar Chetna Award, Manavwadi Rachna Manch Punjab, August (2003); ABP Majha Sanman Purskar (2012); Matoshree Bhimabai Ambedkar Award (2012), Vitthal Ramji Shinde Award (2015); Lifetime Achievement Award from the Indian Sociological Society (2018).

After the introduction of Prof. Gail Omvedt by Mr Pawan Rai, Fr. Principal, Prof Dr George Thadathil gave a welcome address. He welcomed the spokesperson Dr. Bharat Patankar and all faculty members and students present in the webinar, while giving homage to Prof. Omvedt.

Mr Pawan Rai welcomed and gave an introduction of Dr. Bharat Patankar who was the spokesperson of this webinar. Dr. Bharat Patankar was born on 5 September 1949 in a village called [Kasegoan](#), Dist. [Sangli](#) near [Satara](#) and [Kolhapur](#) in the Indian state of [Maharashtra](#). He received his MD degree in [Gynecology](#) at [Government Medical College, Miraj](#). He is a leading activist (co-founder and President) of the left wing of [Shramik Mukti Dal](#). He was one of the founding members of Krantiba Phule Sanskritic Manch. He is a leading activist in the Badwe Hatao movement of Vidrohi Sanskritic Calval. Along with this he participated in numerous irrigation and dam movements in india along with social activism Dr. Patankar wrote numerous books and articles. Some of his outstanding works are: "Characteristics of Contemporary Caste System and its Annihilation" (2014), Maharashtra Shilpakar Nana Patil (2002); Paryayi Vikas Niti (1991). For his outstanding contribution in the field of academics and social activism, he was conferred with numerous awards: Arun Limaye Yuva Jagar Puraskar of Chhatra Bharati; Samajik Krutadnyata Puraskar, Dalit Mitra Puraskar and Baburao Bagul Gaurav Puraskar Award.

After the introduction, Dr Patankar began his lecture by dedicating it to his life companion Prof. Gail Omvedt. He thanked the organizers for holding a memorial to honor her and her work.

Dr. Pathankar started his lecture by pointing out that “community, diversity and egalitarianism in India” were present in there in ancient India.

Matrilineal clans which were called gana-sangas or Matrilineal gana-sangas, were present around Indus valley civilization and these systems functioned according to the ideas of community, diversity and egalitarianism where we can see that there was no exploitation of any kind. These gana-sangas though were matrilineal in nature they were not matriarchal, they provided a field for the growth of an egalitarian society, and there was an absence of contradictions within the community which brought about a feeling of harmony. If there had been a presence of matriarchy then a quasi-state system would have been produced, which would have led to the disintegration of the totality of the community. In India we have the history of matrilineal gana-sangas that were prevalent in the north-east of India and to some extent in Kerala. As there was absence of privatization of property in these matrilineal societies, there arose no cases of enmity between the people. The people lived in complete harmony with his surrounding environment. As these societies were grounded on decentralization of power, there was absence of hierarchy between man and women. There was no question of exploitation regarding gender, class and caste. These matrilineal society gave a classic example of a society based on community, egalitarianism and diversity.

As years went by these matrilineal gana-sangas slowly got transformed into patriarchal gana-sangas. Dr. Pathankar pointed out here that we could still find egalitarianism in these patriarchal gana-sangas, as the concept of privatization had not entered the society. The change that took place between the relationship of man and women and the absence of egalitarianism within the family slowly started to affect the egalitarianism of the gana-sanga. Women is an essential part of the community and when there was exploitation of one part of the community by the other, the egalitarianism cease to exist in the community. So, when the gana-sanga changed from matrilineal to patriarchy, the spirit of egalitarianism also got eroded.

Talking about diversity, he showed that there was diversity in both matrilineal and patriarchal ganasanga. This diversity was neither hierarchical nor exploitative. The nature of this diversity depended on the qualities of a person and his ability and skills. So, this kind of diversity of the cultures and the diversity of the skills was there but without hierarchy. However, these aspects of the patriarchal gana-sangas started getting destroyed parallely south of the Ganges and north, later on in the southern part of India some 600-700 years after the Sangam period. In south India we can see that these

egalitarian community continued much longer than in the north and remained in the eastern part for a longer time than in the south.

With the coming of kingship there was deterioration of the patriarchal gana-sangas. Buddha who was also living in the time of patriarchal gana-sangas tried to create an egalitarian community through his Buddhist sangas because it was absent in the society of that time. Buddha mainly tried to create an egalitarian community that was based on harmony and equality. He took many principles from the matrilineal and patriarchal gana-sangas. Dr. Pathankar pointed out that women were given entry into the Sanga when they came to Buddha and questioned him about the lack of women's participation in a sanga which was egalitarian in nature. From the verses of Therigatha, we know that there was an involvement of women equally along with the men in spiritual attainment and emerging new sangas kept the elements of community, diversity and egalitarianism. Though the existing society during the period had lost its egalitarian nature, the Buddhist and Jain sangas therefore existed as islands which upheld the ideas of egalitarian diversity and community. After the sangas, we can only find some traces of these community in the tribal society in the mountainous regions, who rejected to join the society which has lost its egalitarian diversity and their sense of community cohesion. It can be seen that with the coming of globalization, the community systems held by the tribal people; the Adivasis as well as the eastern hill tribes has been affected. These recent changes have now brought us to a society that has lost its sense of community and egalitarian diversity.

Omvedt when she wrote her *Buddhism in India*, she was the first person to point out that for a thousand years from 600 BC to 600 AD there was an absence of caste system, there may have been existing forms of caste system which however were not discriminatory. It was those very thousand years that prevented caste system from getting established in India, but once the Buddhist monks were killed, the caste system started growing rapidly. One can take the example of Buddha's peaceful intervention into the dasa-shudra slavery which was existing in those days, which led to the abolition of slavery. Here, Buddha can be seen as a reformist who showed the possibility of bringing into practice a society which is based on egalitarian community, without the use of violence.

Through this observation we come towards a question about the needed reestablishment of an egalitarian community that values diversity and harmony among its members. This possibility of establishing such a community was Prof. Gail Omvedt's dream, as stated by Dr. Pathankar. This "dream" towards which Prof. Omvedt worked throughout her whole life was also the dream that was held by Buddha, Babasaheb Ambedkar, Phule and the saint poets like Kabir. Dr. Pathankar lucidly explained how Prof. Omvedt through her analysis has put forward the idea that theorists like Ambedkar and Phule

were also trying to reach an alternative society which is based on egalitarian ideals which protects the idea of the freedom of diversity.

Gail Omvedt's book "Seeking Begumpura", which is based on Saint Ravidas's poem; who imagined of an egalitarian society with diversity, which was also based on the idea of community cohesion. Prof. Omvedt wanted to show that "Begumpura" the city or country without "gum" or "dukkha" (sorrow) is possible even today. Through the analysis of Buddha's intervention in the dasa-shudra slavery we can see that this can only be possible with a unanimous decision of all people who have decided to change this society. This is a question of changing the exploitative system and is not a suggestion of a fight between one majority section and a minority. Dr. Pathankar clearly points out in his words that "it is a question of liberating everyone from the clutches of the existing systems and making everybody more humane." This was the dream which was brought forward by Buddha, saint poets and Ambedkar. This was also the view brought forward strongly by Gail in her book "Seeking Begumpura". The real homage we can give to Gail Omvedt is by seeking Begumpura and reinstating these three aspects of community, diversity and egalitarianism into the creation of a more humane society.

The lecture was followed by an interactive session of questionnaire which was very informative. The webinar helped the students and the faculty to know more about the works of Prof. Gail Omvedt and it made conscious of our responsibility to the establishment of the egalitarian community with diversity.

The session ended with a very thoughtful vote of thanks from Mr Samip Sinchuri (HoD) Department of Sociology.

REPORT

Webinar on 'Career opportunities in e-marketing'

Google meet, Wednesday 29th September: The department of Commerce in collaboration with the department of Vocational studies organized an online webinar on 'Career opportunities in e-marketing in view of providing knowledge to the students about E-commerce market, its merits and demerits and how does it actually function in the real business world. The webinar's main aim was to provide information to the students about the opportunities that lie ahead in e-marketing and how students opting to take e-commerce as their subject in future can make a career out of it.

As guest speaker we had Mr. Tshering Wangdi Yolmo, Co-founder of Cultsport (sportswear brand of curefit), man of eminent personality and experience in the field of E-commerce. He gave a very descriptive view of information on how actually the e-marketing works, its levels, advertising, departments etc. And the skills required to pursue the job saying the student must be well educated, well spoken with good communication skills and should be fluent in English. And most importantly he asked students to give more emphasis on their master's degree saying it to choose wisely as to what they want to do in future and try to get it from a good reputed college.

After the talk ended there was Q and A session, where in numerous questions were asked and answered clearing the doubts and giving more information that was to know about e-marketing to the audience. At last Alisha Soreng of B.com 1st semester gave the vote of thanks, thanking our chief speaker for his precious time that he had given us and the faculty members for organizing the webinar. The program commenced at 9:30am and lasted till 11 am and was finally concluded with the words of Rector Fr. Dr. Tomy Augustine, SDB, thanking everyone for their precious time.

REPORT

RESEARCH SCHOLARS' WORKSHOP 08 November '2021

Research Scholars' Workshop was held on 8 November 2021 in the newly inaugurated Research and Publication centre. The resource persons for the workshop were Prof. Irshad Ahmed, Prof. G.N. Roy and Fr. Prof. George Thadathil.

The first session consisted of a talk by Prof. Irshad Ahmed on Research and Research Writing. It was followed by Ph.D scholars having one to one meeting with the resource persons to discuss issues that needed clarification and guidance. The others had a sharing session on their research interest and on writing papers which was moderated by Dr. Terence Mukhia.

It was followed by a presentation on Undergraduate Research by Fr. Dr. Tomy Augustine. In the post lunch session the departments met together to chalk out their plan for promoting undergraduate research among final year students followed by general assembly in which the departments shared their plans. The workshop concluded with a valedictory function during which Prof. G.N. Roy shared his views on undergraduate research.

REPORT

Webinar On: Research and Methodology

On 24th of August B.C.A department organised a webinar on “Research and Methodology”, the Resource person of the event was Dr Sukanta Nandi. The webinar started with an introduction of Dr Sukanta Nandi by host of the event Miss Priyadarshini Pradhan. Rector Father Tomy Augustine gave a warm welcome to everyone present in the webinar and started the webinar with a prayer. Dr Sukanta Nandi keeping in mind the participants of webinar was under graduate students made the topic Research and Methodology very simple and effective. Dr Sukanta almost gave an hour of lecture and presentation for the topic. After he finished the presentation Vice principal Br Jose interacted with the resource person and participants with his observation on the presentation and gave his valuable thoughts and encouraged the students to start with some small projects and research. Mr Nikhil Pradhan at last concluded the event with a vote of thanks to resource person Dr Sukanta Nandi for accepting the proposal of resource person and giving his valuable time. Mr Nikhil Pradhan also appreciated and thanked all the heads of management, faculty and everyone present in the webinar.
